DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/15/2008 has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 12/15/2008 was filed. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

3. Claim 15 is allowed.
4. Claims 3, 8, and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 2, 4-7, and 9-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Lehr et al.[Lehr](US Patent 6,985,713).

As to claims 1, 2, 4-7, and 9-11

Lehr discloses an inline power device/power source equipment/apparatus for inline power/network switch(hub 106, see Fig. 1) and method of a network power system(data communication network; see Fig. 1) comprising at least one physical layer(hub side 100, see Fig. 1) including an inline power control signal source(hub side notification functionality 107, see Fig. 1) originating from the physical layer, wherein the inline power control signal is configured to indicate when to apply power to a port(network connections 104, see Fig. 1) when there is no power applied to the port and when to remove power from the port when there is power applied to the port(see column 5, lines 22-24).

Response to Arguments

6. Applicant's arguments, see Remarks, filed 12/15/2008, with respect to the rejection(s) of claim(s) 1-2, 4-7, and 9-11 under 35 U.S.C. 103(a) as being unpatentable over Bell(US Patent 6,701,443) in view of Gephardt et al.(US Patent 5,640,573) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of claims 1, 2, 4-7, and 9-11 which are now rejected under 35 U.S.C. 102(e) as being anticipated by Lehr et al.[Lehr](US Patent 6,985,713).
